

## **Vorpals Zephyr**

Available in a range of sizes to suit your needs, the all stainless constructed Vorpals Zephyr moderator attaches directly to the accessory thread of the Vorpals Solo.

Internal guide rails allow rapid alignment and fitting while the robust threadform is much less prone to the type of damage commonly found when attaching moderators to fine barrel threads.

Removing and refitting the Zephyr moderator can be done simply and easily even at night or in cold, wet conditions without danger of cross threading or muzzle damage.

Available in natural stainless or with a black nitride finish.

**A variation to your FAC is required for this moderator.**

As with all moderators, the Zephyr should be removed for storage.
